

Product Pricing Information

Consultant Pricing as of April 2018

The following information applies to all products:

New Consultants:

A discount of 25% is applied to the software license portion of the retail price for new Authorized Consultants on their first order if the order is pre-paid via check or eCheck; a 20% discount is applied to the software license portion of the retail price if the order is paid with a credit card. A 10% discount is applied to the maintenance portion of the retail price, and to the retail price of Tabs3 Connect subscriptions.

Authorized Consultants:

Only Authorized Consultants are allowed to sell Tabs3 products. It is a requirement that Authorized Consultants assist firms with the installation and training of any Tabs3 software they sell. After their first order, Authorized Consultants may place orders with a credit card for a 30% discount on the software license portion of the retail price; a 35% discount is applied to the software license portion of the retail price for orders pre-paid via check or eCheck. A 10% discount is applied to the maintenance portion of the retail price, and to the retail price of Tabs3 Connect subscriptions.

Certified Consultants:

Once Authorized Consultants have had multiple successful installations of Tabs3 Billing and PracticeMaster and have met certain requirements, they can become Certified Consultants. Certified Consultants are regularly recommended by Software Technology, LLC., to assist in the sales, installation, training, and ongoing support of Tabs3 products. Certified Consultants may place orders with a credit card for a 35% discount on the software license portion of the retail price; a 40% discount on the software license portion of the retail price is applied to orders that are pre-paid via check or eCheck. A 10% discount is applied to the maintenance portion of the retail price, and to the retail price of Tabs3 Connect subscriptions.

Active Users:

Active Users are based on the number of users that will be accessing the software at the same time, not the total number of users set up in the system. Even Single User versions allow an unlimited number of users to be set up; the only limitations are on the number of users that access the software at the same time and on the number of timekeepers set up in the system.

Delivery:

Nearly all orders are fulfilled electronically. However, CDs are shipped for firms purchasing ODBC Drivers and special utility programs. All CD orders ship from Lincoln, NE. Orders also can be expedited to UPS Red Label or UPS Blue Label for an additional charge. Federal Express service may be used instead of UPS if a valid Federal Express account number is provided.

Please contact our Sales Department with any questions: **(402) 419-2200** or **sales@tabs3.com**.

All prices are subject to change without notice.

Note: The Platinum Server requires five connections for overhead purposes as discussed in the following. These connections are reserved by the Platinum Server and cannot be used by other users.

- *Tabs3 Accelerator* - The Tabs3 Accelerator uses one connection (T3Accel.exe). This connection is used as soon as a user logs into Tabs3 and is open until the last person logs out of Tabs3. All users use the same instance of T3Accel.exe.
- *PracticeMaster Accelerator* - The PracticeMaster Accelerator uses one connection (PMAccel.exe). This connection is used as soon as someone logs into PracticeMaster and is open until the last person logs out of PracticeMaster. All users use the same instance of PMAccel.exe.
- *HotBackup* - The HotBackup (SThb.exe) actually uses two connections. These two connections are only used when a HotBackup is being created. One connection is used to perform the HotBackup. The second connection is used to monitor the HotBackup.
- *Tabs3 Connect* - Tabs3 Connect uses one connection (T3Connect.exe). This connection remains active as long as Tabs3 Connect is enabled in System Configuration.

For example, suppose a firm has 5 users. All 5 users have PracticeMaster running at the same time (i.e., 5 connections), 3 of the same users also have Tabs3 running (i.e., 3 more connections), and 1 of the users also has APS and TAS running (i.e., 2 more connections). Assume the firm has enabled the Tabs3 and PracticeMaster Accelerators and is using HotBackup and Tabs3 Connect. With the 5 additional connections required by the Platinum Server, this results in 15 combined Platinum version software connections running at the same time on the network (5 + 3 + 2 + 5 overhead = 15). In order for this to occur, the firm would need to have a minimum server connection level of 16.

* ODBC SQL Driver (32-bit and 64-bit versions) is included with purchase of the Platinum SQL Server.

** All retail prices include one full year of maintenance for the client.

*** A 10% discount on maintenance is built in to the consultant discount pricing.
